Infratab, Inc. Named to Food Logistics' 2019 FL100+ Top Software and Technology Providers

Infratab Freshtime™ solution provides food industry access to perishables' real-time shelf life status and creates unalterable blockchain records

Oxnard, California – Food Logistics, the only publication exclusively dedicated to covering the movement of product through the global food supply chain, has named Infratab, Inc. to its 2019 FL100+ Top Software and Technology Providers list. The annual FL100+ Top Software and Technology Providers serves as a resource guide of software and technology providers whose products and services are critical for companies in the global food and beverage supply chain.

Infratab Freshtime™, the company's RF sensor solution, monitors the temperature and condition of perishables, adding "How is it?" to the what, where, when and why of supply chain tracking. The solution of tags, dashboards and cloud data services provides the food industry access to perishables' real-time shelf life status and creates unalterable blockchain records, giving both producers and retailers the tools they need to reduce product waste and ensure their customers get the quality they expect.

"We are constantly expanding the capabilities of Freshtime to make the data richer and the system easier to use," said Stanton Kaye, President of Infratab, "So it's a great honor to be recognized by Food Logistics for our work for the sixth year!"

"Whether you're using sensors to monitor critical temperatures for perishables or a WMS to manage inventory flows in your warehouse, software and technology are playing a vital role in the food and beverage industry," remarks John R. Yuva, editor for Food Logistics and its sister publication, Supply & Demand Chain Executive. "The transparency and safety of the digital global food supply chain would not exist without innovations in software and technology. Our FL100+ recipients help drive supply chain compliance and regulatory changes that benefit everyone from the farmer to the food processor to the consumer."

Companies on this year's 2019 FL100+ Top Software and Technology Providers list will be profiled in the November/December 2019 issue of Food Logistics, as well as online at www.foodlogistics.com.
